Subject: RE: Statement rive use

Here is what we had in a previous news release:

Due heavy rain in the forecast, the public may see another pulse of discolored water in the Upper Cement Creek and Animas River. The EPA and local La Plata

County officials will continue to collect samples of the water quality.

Sarah and Libby,

Thanks for putting this together. I like the message and the fact that it conveys somewhat of a time line instead of leaving this open ended.

I know the forecast is calling for heavy rain tomorrow, do we also want messaging that states we may see some decreased water quality if rain totals and runoff are heavy?
